

Discover our comprehensive range of 3U and 6U OpenVPX Ethernet Switches

With its broad range of 3U/6U OpenVPX GbE/10GbE Ethernet switches, Interface Concept has become a leading player on the VPX market place. Various and flexible switch configurations enable users to build systems, in line with their application needs. A Switchware software package, developed and supported by IC, allows customers to configure and manage these switches - Hybrid (PCIe for data plane and Ethernet for Control Plane) or Ethernet only Switches.

All these L2/L3 switches are compliant with OpenVPX and VPX VITA standards. They are available in standard, extended, rugged and conduction-cooled grades.

Cometh4580a

10GigaE L2/L3switch

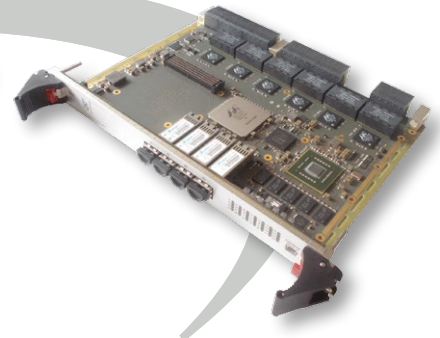

Cometh4345a
